

# ENHANCING HNS PREPAREDNESS THROUGH TRAINING AND EXERCISING

## MARINER

*Project overview*

**HNS-MS final workshop  
14<sup>th</sup> December 2016. Brussels**

Funded by  
European Union  
Humanitarian Aid

# Background

- The transportation of chemicals has grown considerably in the recent years (estimated 215 Million tonnes in 2015 ([source](#)));
- Approximately 2,000 different chemicals are transported by sea ([source](#));
- **Accidents involving chemicals happen:** Around 100 incidents happened in European waters between 1987 and 2006. (EMSA, [Source](#)).
- **HNS spills pose risks to the environment and human health;**
- **Fragmented research on HNS preparedness and response.**

# Project bullet points

---

## Objective:

Improve regional cooperation in planning, preparedness and response to HNS spills by improving **training** and **exercise**, by increasing awareness and information exchange and by capitalization and translation of HNS relevant R & D projects' outcomes into operational products.

**Co-financing Programme:** Call 2015 for prevention and preparedness projects in the field of civil protection and marine pollution. DG-ECHO.

**Policy area of activity:** Preparedness.

**Priority:** Improving marine pollution cooperation, including regional cooperation, regarding interoperability and preparedness for direct response to and reducing impacts of manmade disasters. Specific focus area: better planning and preparing for spills of hazardous and noxious substances into the marine environment.

**Start date:** 1<sup>st</sup> January 2016

**End date:** 31<sup>st</sup> December 2017

**European Commission contribution:** 748.910 EUR (75 %)

**Total budget:** 998.547 EUR

# Project tasks

Funded by  
European Union  
Humanitarian Aid

# Task B: HNS knowledge compilation & facilitation

## Specific objective:

Identify and compile existing HNS preparedness and response knowledge generated by EU funded public research as well as existing resources and make them easy available to end users through a user friendly tool connected to existing platforms and by targeted transfer actions.

**Manager:** CETMAR

**Participants:** All

## Main results and estimated delivery date:

- A user friendly visualization and knowledge management **tool gathering all relevant information addressing key issues on HNS**. June 2017.
- Set of **graphical materials**. June 2017.
- **Key outputs transferred**. December 2017

Funded by  
European Union  
Humanitarian Aid

# Task C: HNS modelling and environmental impact

## Specific objective:

- Improve the interoperability and the operational use of tools for modelling HNS transport, behaviour and biological impact;
- Definition of protocols and guidelines for environmental impact assessment of HNS spills.

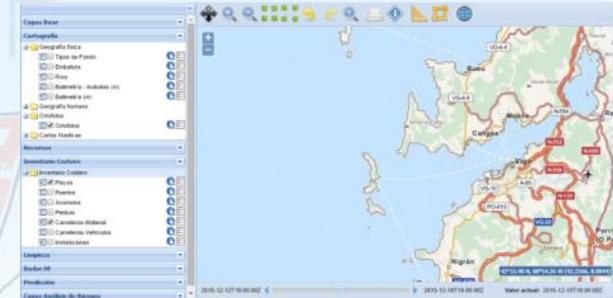

**Manager:** AM.

**Participants:** INTECMAR, CIIMAR, CEDRE, Uvigo.

## Main results and estimated delivery date:

- Improved **HNS spill model integrated into a Common Operational Picture**. Includes a module on environmental effects at population level. February 2017.

- Cross border guidelines and **protocols for HNS environmental impact assessment**. July 2017.

Funded by  
European Union  
Humanitarian Aid

# Task C: HNS modelling and environmental impact

Contribution to exercise (ATLANTIC.POLEX 2016): integration of external model from CIMA-University of Algarve in MARINER PLATFORM

Funded by  
European Union  
Humanitarian Aid

# Task D: HNS response – seeking synergies with experts

## Specific objective:

- Identification of existing expertise from chemical industry, civil protection mechanisms and fire's crews and their main response protocols and equipment to be adapted for marine events.
- Development of guidance documents for Good Practices and training for specialized antipollution vessels operating in coastal areas.

**Manager:** INTECMAR.

**Participants:** CEDRE, PHE, CIIMAR, AM, Uvigo.

## Main results and estimated delivery date:

- **Adapted response protocols to be included in contingency plans.** June 2017.
- **Training and exercise events to test the adapted protocols in specialized antipollution vessels.** October 2017.
- **Multilingual video on training.** Dec 2017.

Funded by  
European Union  
Humanitarian Aid

# Task E: HNS training and exercising

## Specific objective:

- Develop and trial an innovative training and exercise process and bespoke software tool aimed at shoreline maritime HNS incident preparedness for public health protection.
- Apply and incorporate EU and international cross-border preparedness protocols within exercise scenarios.
- Develop training materials packages and delivery of courses addressed to cover key issues of HNS preparedness and response.

**Manager:** PHE.

**Participants:** CEDRE, Uvigo, AM, CIIMAR, INTECMAR.

## Main results and estimated delivery date:

- **Web based database exercise tool.** September 2017.
- **E-learning materials on exercises and risk assessment.** November 2017.
- **Training package on HNS spill management.** November 2017.
- **Training package on HNS modelling.** Aug. 2017.

Funded by European Union Humanitarian Aid

# Task F: Communication

## Specific objectives:

Transfer project outputs to competent authorities and to raise awareness among the general public

**Manager:** CETMAR

**Participants:** All

## Main results and estimated delivery date:

- **Dissemination plan.** February 2016.
- **Dissemination materials: logo, leaflet, poster, Layman's report.** April 2016 – November 2017.
- **Website & social media.** May 2016.
- **3 Regional workshops.** April - September 2017.
- **Final conference.** December 2017.

# Knowledge dissemination & transfer

---

*The key MARINER goal is the production of tangible results and the effective transfer of those results to end users*

**MARINER results will be transferred to end users through targeted actions:**

- Integrating end users into the project structure: The MARINER Advisory Board is made up of representatives of national competent authorities (UK, FR, SP, PT);
- Specific transfer actions for results with higher potential of transferability (Task B4)
- Organising project events aiming at national, regional and local authorities:
  - Training sessions
  - Workshops
  - Exercises
- Sharing results through different vias:
  - MARINER website,
  - ARCOPOL Platform ([Atlantic Technological Platform for oil and HNS spill preparedness, response and mitigation](#))
  - Participation in conferences and meetings in the scope of MARINER (meetings with EMSA, Bonn Agreement, etc.)
  - Others...

*Results integrated into end users' operational protocols*

# Interaction with HNS-MS

## Interoperability: HNS online database to be used in MARINER platform

1. What?

2. Where?

3. When?

4. Run

### Incident Name

2016-12-11 01:16:57 Sim Name

### Substance Type

HNS Spill

### Chemical Spill Options

- Benzene (Evaporator)
- Chlorine gas (Gas)
- Ammonia (Gas-Dissolver)
- Benzene (Evaporator)
- Styrene (Evaporator-Floater)
- Di-n-butylamine (Evaporator-Dissolver-Floater)
- Methanol (Evaporator-Dissolver)
- 1-nonanol (Floater)**
- Aniline (Floater-Dissolver)
- Ethanolamine (Dissolver)
- Perchloroethylene (Sinker)
