

# Multinational Response and Preparedness to Oil and Chemical Spills

**Consortium:** MARETEC-IST (coordination; Portugal)- [www.maretec.org](http://www.maretec.org) ; Action Modulers (Portugal) – [www.actionmodulers.com](http://www.actionmodulers.com) ; CEDRE (France) [www.cedre.fr](http://www.cedre.fr) ; PLOCAN – Plataforma Oceanica de Canarias (Spain)- [www.plocan.eu](http://www.plocan.eu); Univ. Las Palmas de Gran Canaria (Spain) - [www.pct.ulpgc.es](http://www.pct.ulpgc.es); INRH – Institut National de Recherche Halieutique (Morocco) - <http://www.inrh.ma/> ; OOM- ARDITI – Observatório Oceânico da Madeira (Portugal) - <http://oom.arditi.pt/>

**Support / Advisory Board:** APRAM / Portos da Madeira (Portugal); Proteção Civil da Madeira (Portugal); Directorate General of Security and Emergency of Canarias Government, Spain (Spain); SASEMAR (Spain); DCPM-DGAM (Portugal); African Maritime Safety and Security Agency (AMSSA); Secretary General for Marine Fisheries at the Moroccan Ministry of Agriculture and Marine Fisheries of Morocco; Ministry of Energy, Mining, Water and Environment of Morocco; Marine Traffic (UK); MARINER project (coordination: CETMAR); HNS-MS project (coordination: RBINS)

Rodrigo Fernandes

## Lisbon Agreement (CILPAN):

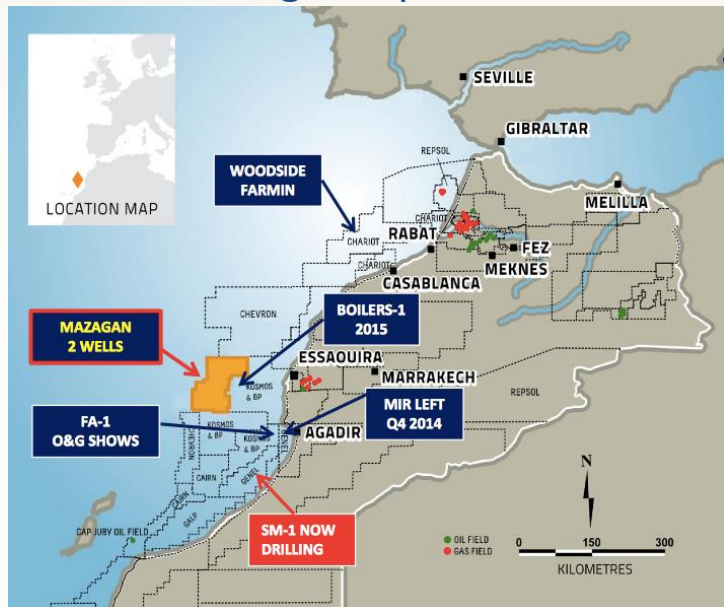

- 

# 1. Background | Oil spills

## Risk of oil spills threatening cross-border region:

- Area with high socio-economic dependence on marine coastal resources (e.g. fisheries, tourism)
- Accidents: Oleg Naydenov (2015, Gran Canaria)
- Oil and gas exploration in Morocco

### Oil spill reaches coast of Gran Canaria

Spanish officials say sunken Russian fishing boat Oleg Naydenov continues to leak up to 10 litres of fuel an hour off tourist island

24 Apr 2015 6

## 2. Objectives and expected results

---

### Main Objective:

- Common operational framework for preparedness and response to oil and HNS spills in the Atlantic sub-region involving Morocco, Madeira and Canary Islands in the context of Lisbon Agreement
  - Built on present and previous EU efforts (e.g. EMSA / CLEANSEANET; MAR-ICE), international strategies (OPRC-HNS) and R&D projects (e.g. ARCOPOL platform; HNS-MS; MARINER)

### Expected results:

- Operational and tactical **model-based DSS's** supported by 3D **oil & HNS spill modelling system** (MOHID), using new and/or improved **high resolution metocean forecasting systems**
- **Automatic early warning spill forecasting** connected to existing maritime surveillance automatic services (EMSA's CLEANSEANET service: satellite-based oil spill detection)
- **Training sessions, courses, exercises and hands-on demonstrations**, with special focus on emergency preparedness or response scenarios involving multiple nations
- Characterization of typical and dynamic **shoreline holistic risk from spills** in the area of interest (in order to identify “hot spots”, to improve management of the distribution of response resources, and to allow real time risk shoreline monitorization)

# Oil spill model

---

- Deep sea / Blowout spills
- Intercomparison exercises
- Probabilistic maps based in uncertainties
- Biological exposure and effects model
- Dispersion of evaporated oil components

- Cooperation with Dalhousie University / MEOPAR project (Canada)
  - Oil-gas interaction
  - Integration of near-field with farfield
  - Coupling advanced models (recent work by SINTEF and TAMOC from Texas University)

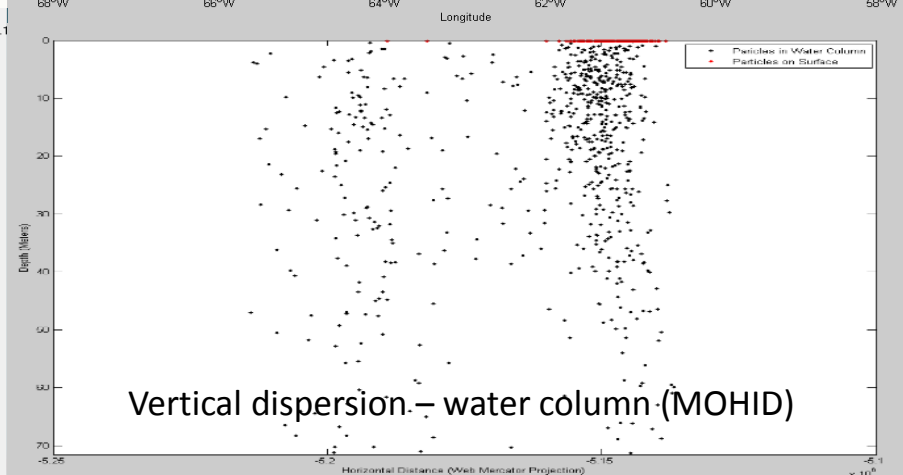

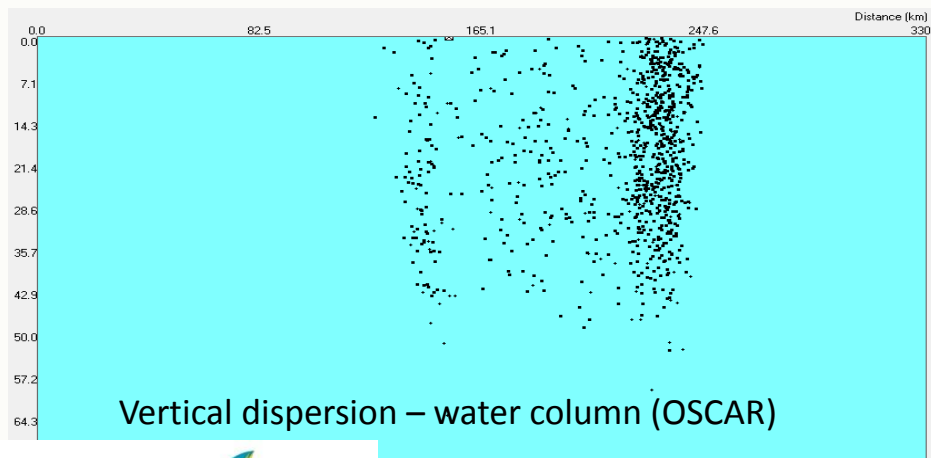

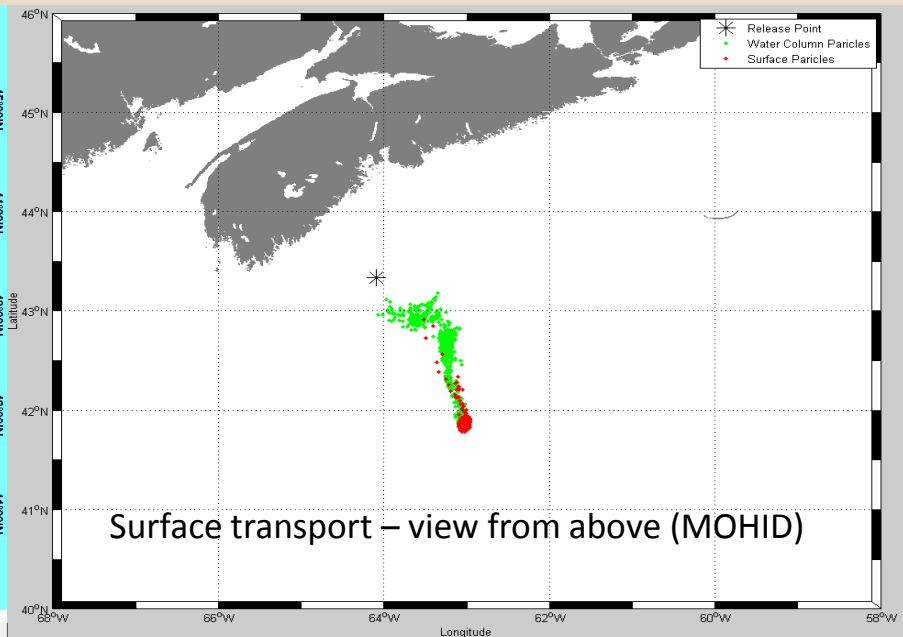

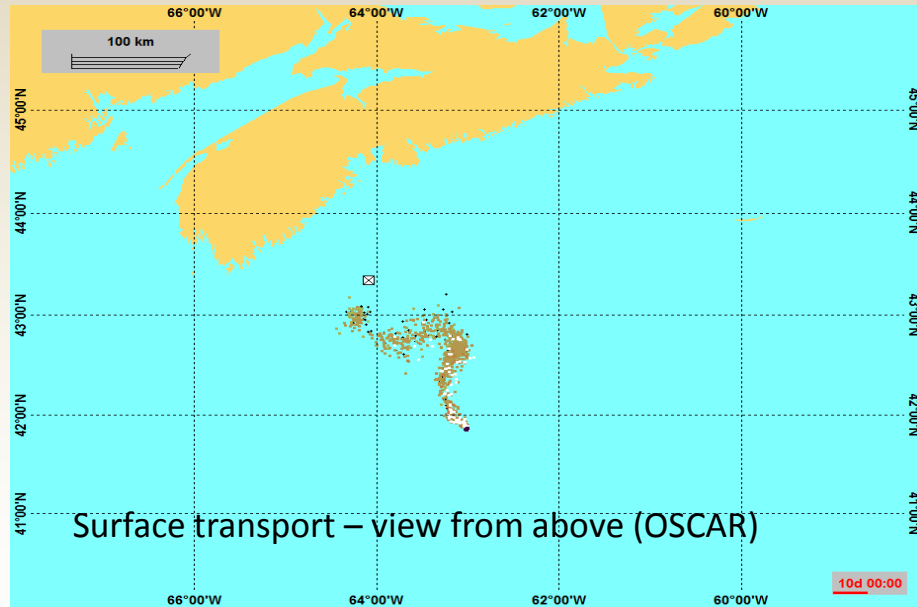

# Oil spill model | intercomparison

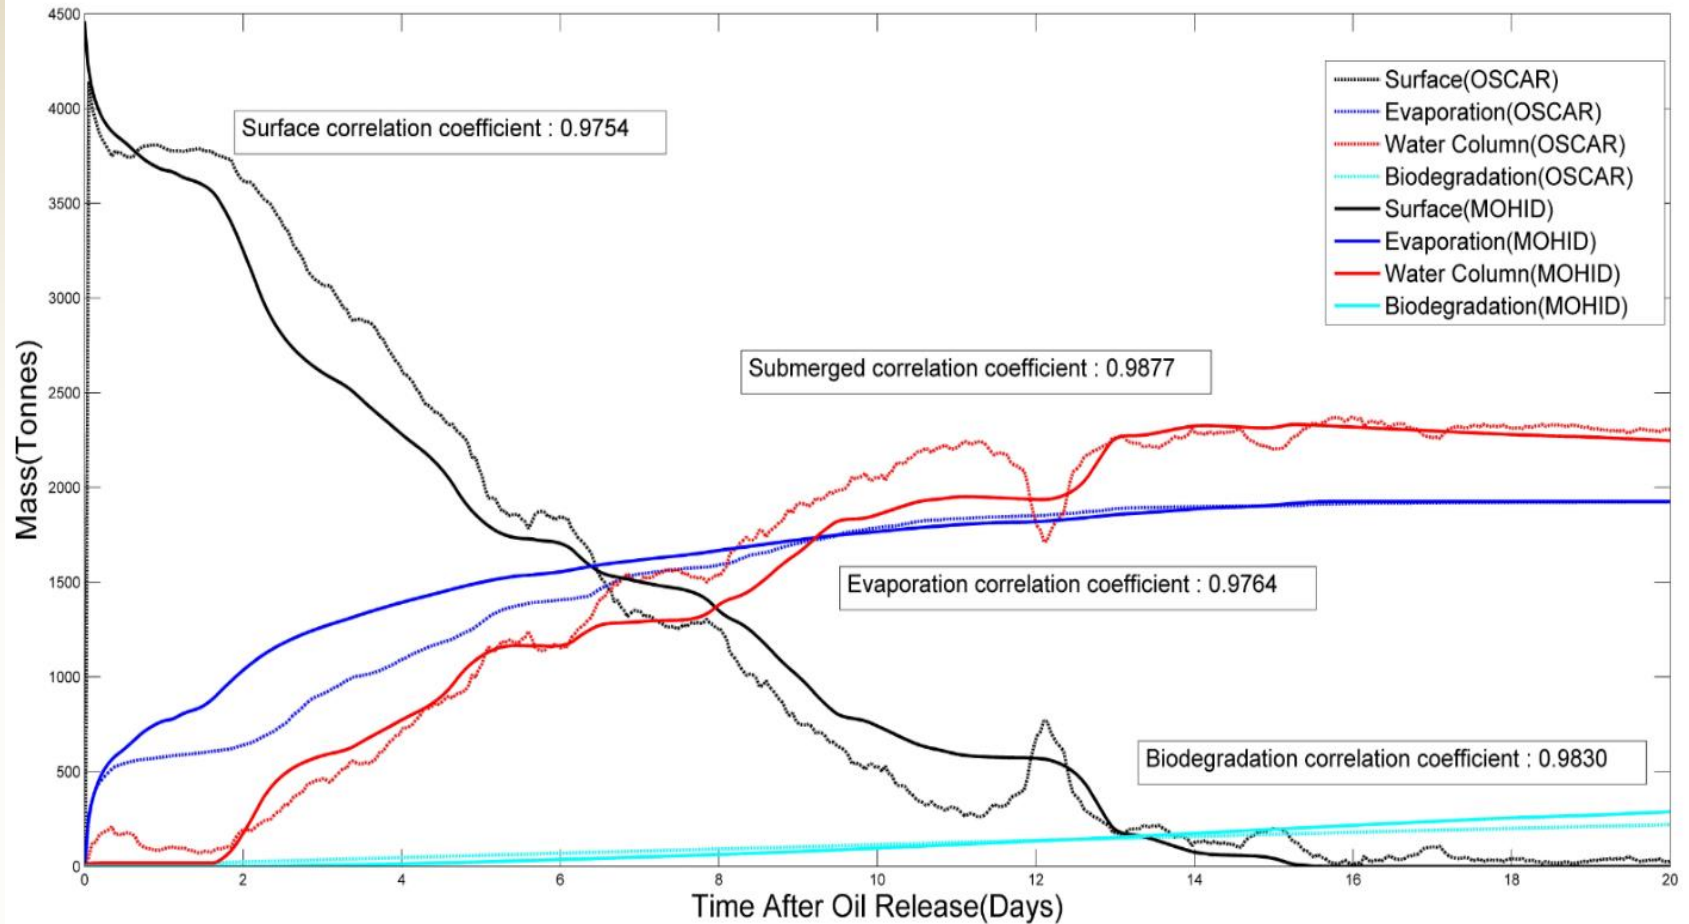

## OSCAR vs MOHID | Trajectory intercomparison

# Oil spill model | intercomparison

## ➤ OSCAR vs. MOHID | Mass balance comparison

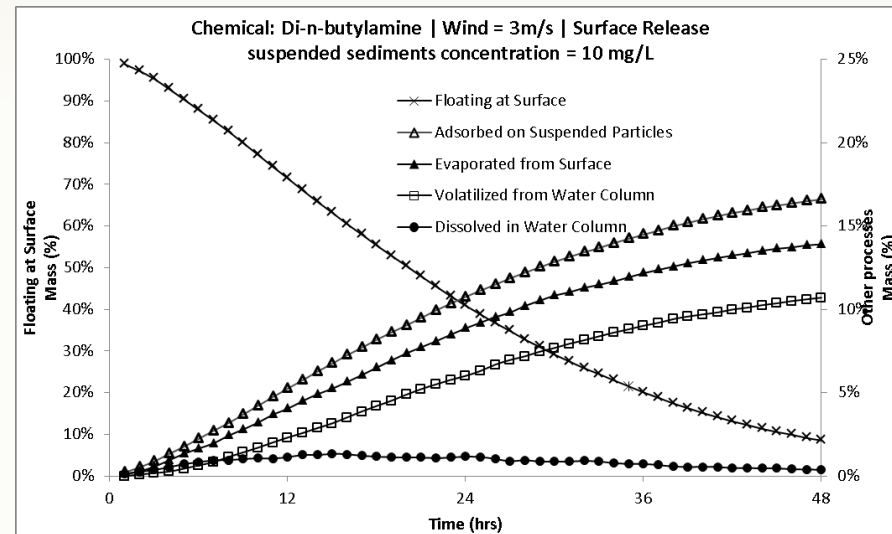

# Chemical spill model

- Interaction with benthic layer (bibliographic review, revision of algorithms)
- Calibration based on laboratory measurements (CEDRE; HNS-MS)
- Intercomparison with other models (CHEMMAP; HNS-MS?)

2. Where?

3. When?

4. Run

### Incident Name

2016-07-11 01:56:58 Sim Name

### Substance Type

HNS Spill

### Chemical Spill Options

1-nonanol (Floater)  
Chlorine gas (Gas)  
**Ammonia (Gas-Dissolver)**  
Benzene (Evaporator)  
Styrene (Evaporator-Floater)  
Di-n-butylamine (Evaporator-Dissolver-Floater)  
Methanol (Evaporator-Dissolver)  
1-nonanol (Floater)  
Aniline (Floater-Dissolver)  
Ethanamine (Dissolver)  
Perchloroethylene (Sinkers)

Will connect to external online databases (CIIMAR; HNS-MS)

## MOHID-CSN service: spill detected at 26-4-2016

- MOHID-CSN service:
  - System to be implemented in MARPOCS region
  - It is being presently tested (in operational mode) in cooperation with Portuguese and Spanish Maritime Authorities

- Documentation, training & Exercising in Canary Islands, Madeira, and Morocco
  - Videos
  - Online forum to support DSS
  - Local Roadshows
  - Hands-on training sessions
  - Tabletop exercises

# Project events and places

---

Dates	Project events and places
January 2016	Program kick-off: DG-ECHO, Brussels, Belgium
February 2016	Coordination meeting I: IST, Lisbon, Portugal
July 2016	Coordination meeting II: CEDRE, Brest, France
March 2017	Coordination meeting III + Workshop I + 1 day training course I: Casablanca, Morocco
June 2017	Coordination meeting IV: Funchal – Madeira Island, Portugal
October 2017	Roadshow I + tabletop exercise I: Funchal – Madeira Island, Portugal
November 2017	Roadshow II + tabletop exercise II + 1 day training course II: Agadir, Morocco
December 2017	Workshop II + Roadshow III+ tabletop exercise III: Las Palmas - Canary Islands, Spain

# Opportunities for future collaborations

---

- Model development:
  - Multi-model ensemble forecasts
  - Pollution in riverine areas (MOHID Land)
- Model application:
  - Intercomparison exercises
- Software development:
  - Interoperability, web services and common API's
  - Visualization tools and mobile interfaces
  - Integration with remote sensing technologies
